

# Design Engineering's index for 1973

## Assembly

|   |         |
|---|---------|
| ANSI continues to develop OMFS.....                   | Jun p42 |
| What's new in fasteners .....                         | Jun p45 |
| Ultrasonic welder for plastics is portable.....       | Sep p49 |
| Endplay or preload easily set on tapered rollers..... | Oct p62 |

## Drawing office

|  |         |
|--|---------|
| Engineering design process. Do you use it effectively?.....  | Jan p42 |
| Need industrial design help? Ask the federal government..... | Feb p32 |
| Simplify dimensioning and tolerances to cut costs.....       | Feb p34 |
| Drawing office equipment and supplies buyers' guide.....     | Feb p42 |
| Peripheral reads handwriting.....                            | Apr p52 |
| Dial-a-circuit speeds air logic design.....                  | Jul p55 |

## Electrical and electronic

|  |          |
|--|----------|
| Static variable frequency control for AC motors.....     | Jan p36  |
| Avoid positive gate bias and reverse voltage.....        | Jan p39  |
| Linear variable differential transformers.....           | Jan p40  |
| Capacitance measures position.....                       | Jan p44  |
| Electric motors and controls buyers' guide.....          | Jan p45  |
| Techniques of magnetic and electrostatic suspension..... | Feb p37  |
| Peripheral reads handwriting.....                        | Apr p52  |
| FRP pipes are electrically conductive.....               | Sept p46 |
| Toroidal transformers — from Faraday to ferrites.....    | Sep p52  |
| How to terminate aluminum conductors.....                | Nov p47  |
| Eight servo pumps power pipe press.....                  | Nov p54  |

## Fluid handling

|                               |         |
|-------------------------------|---------|
| Fluid handling equipment..... | Aug p20 |
|-------------------------------|---------|

## Fluid power

|  |          |
|--|----------|
| Linear and rotary motion from one unit.....                          | Mar p50  |
| Use negative force for positive results.....                         | Apr p42  |
| Compressor uses new rotary principle.....                            | Apr p49  |
| Cylinder adjusts to size of workpiece.....                           | Apr p52  |
| Long-life seal material gives fifty times life of leather seals..... | May p67  |
| Fluidics control speed of air motors.....                            | Jul p52  |
| Fluid power displaces man power in controlling log dams.....         | July p55 |
| Hydrostatic transmission developments.....                           | Jul p56  |
| Small company makes big hydraulics.....                              | Jul p60  |
| Canada's fluid power and controls buyers' guide.....                 | Jul p61  |
| Air logic for automation.....  | Aug p32  |
| Eliminate hydraulic shock with axial flow desurgers.....             | Oct p64  |

## Materials

|   |         |
|---|---------|
| Metal alloy forms like thermoplastics.....  | May p44 |
| Steel sheet gets improved formability.....  | May p46 |
| New HS age-hardenable SS.....   | May p47 |
| New injection moldable thermosets.....  | May p48 |
| Long term properties of thermoplastics.....   | May p49 |
| Glass spheres improve tooling resins.....   | May p52 |
| UHMW polyethylene gives valves five times abrasion resistance of stainless steel..... | May p55 |
| GR polyester saves weight on sports coupes.....                                       | May p55 |
| Fluoropolymer can be glass reinforced.....  | May p56 |
| Food cooked on polysulfone grill.....   | May p57 |

|   |         |
|---|---------|
| More glass fibre in new car bodies.....                               | May p58 |
| Aluminum pays off in railroading.....                                 | May p60 |
| In retrospect — the soybean car body.....                             | May p63 |
| Plastic platform with PTMT rollers aids in launching waterskiers..... | May p63 |
| Better powders and production methods.....                            | May p64 |
| Heat exchange tubing is fluorocarbon covered.....                     | May p67 |
| HSLA steel good for pipe in extreme cold.....                         | May p67 |
| Rubber gives variable spring rate.....                                | Jun p39 |
| The right materials for wrong noises.....                             | Jun p40 |
| Where are plastics heading?.....                                      | Sep p38 |
| A new engineering thermoplastic resin.....                            | Sep p39 |
| New polyaromatic resin in pilot production.....                       | Sep p39 |
| Foamed urethane cures at room temperature.....                        | Sep p39 |
| Thermoplastics rigidized by sprayed-on FRP.....                       | Sep p40 |
| Foaming and forming automated in continuous line production.....      | Sep p41 |
| Elastomeric bearings — what, how, where.....                          | Sep p42 |
| Welder's face mask molded from PTMT.....                              | Sep p46 |
| Bilge pump switches to thermoplastic polyester.....                   | Sep p46 |
| Developments in filament winding.....                                 | Sep p47 |
| Fuel tanks roto-molded from HDPE.....                                 | Sep p47 |
| Plastic-gear flywheel improves signal flasher.....                    | Sep p48 |
| High alumina ceramics by injection molding.....                       | Sep p48 |
| Shopping mall furniture combines FRP with melamine.....               | Sep p49 |
| Ultrasonic welder for plastics is portable.....                       | Sep p49 |
| Glass reinforced polypropylene forms on metal-working machinery.....  | Sep p50 |

## Mechanical power transmission

|   |         |
|---|---------|
| What's new in gearmotors.....                         | Mar p52 |
| Schmidt coupling cuts chatter.....                    | Apr p52 |
| What's new in shaft couplings.....                    | Apr p53 |
| Designed-in balance provision for rolls.....          | Jun p38 |
| Structures lock as they unfold.....                   | Sep p41 |
| Elastomeric bearings — what, how, where.....          | Sep p42 |
| Rings on shaft give traversing motion.....            | Oct p58 |
| Drive your conveyor belts the easy way.....           | Oct p60 |
| Endplay or preload easily set on tapered rollers..... | Oct p62 |
| Sprockets move radially to change ratio.....          | Oct p63 |
| Mechanical power transmission buyers' guide.....      | Oct p65 |

## Miscellaneous

|  |           |
|--|-----------|
| Making the most of your job interview — 1.....       | Jan p80   |
| CANDU can and does.....                              | Mar p42   |
| DHC-7 will operate from downtown strips.....         | Mar p45   |
| Steam still contender for cleaner cars.....          | Mar p48   |
| Making the most of your job interview — 2.....       | Mar p82   |
| Rotary engine takes to water.....                    | Apr p45   |
| Canada's nuclear reactors.....                       | Apr p46   |
| ACVs are getting off the ground.....                 | Apr p50   |
| Making the most of your job interview — 3.....       | May p86   |
| Fins and pendulum mechanism help stabilize roll..... | Jun p43   |
| New IC engine has orbiting piston.....               | Jun p44   |
| The 1973 job market.....                             | July p116 |
| The canned pump gives zero leakage.....              | Aug p31   |
| The hidden job market.....                           | Sep p78   |
| New engine has nutating sphere.....                  | Oct p63   |
| Automation in action: 1973 roundup.....              | Nov p36   |
| McMaster U. launches N/C centre.....                 | Nov p52   |
| An anti-rut prescription.....                        | Nov p78   |
| Canadiar design '73.....                             | Dec p38   |
| Pick of the products '73.....                        | Dec p46   |
| Roundup of 1973 technical literature.....            | Dec p56   |

# Design Engineering's index for 1973
